

MD. MOHIUZZAMAN

Software Engineer

📍 171/1B, West Kafrul, Sher-E-Bangla-Nagar, Dhaka-1207

☎ +880 1878759001

✉ anikmd445@gmail.com

Education

BRAC University

Bachelor of Science: Computer Science and Engineering — 2024

CGPA: 3.84/4.0

Profiles

<https://www.linkedin.com/in/md-mohiuzzaman/>

<https://github.com/ANIK-01>

Skills

Programming Languages

Python, C#, Java, C++

Frameworks & Libraries

- Web & Backend

ASP.NET Core 8, Quarkus, Express.js, React.js

- Machine Learning & AI

PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, LangChain

- Web Scraping & Automation

Beautiful Soup

Machine Learning & Data Science

Machine Learning, Deep Learning, Federated Learning, Data Science & Analytics, NLP

Databases & Tools

MySQL, PostgreSQL, Docker, Git, Postman, Power BI

Hardware & IOT

Arduino Uno, Raspberry Pi

Document & Reporting Tools

LATEX (Overleaf)

Awards

Best Thesis Award

BRAC University

March 2025

<https://www.bracu.ac.bd/>

Received the **Best Thesis Award - Summer 2024** from the Department of Computer Science and Engineering for outstanding undergraduate research.

Summary

Software Engineer with hands-on experience in ASP.NET Core 8 for backend development, building scalable and efficient enterprise applications. Experienced in Python, machine learning, data science, and web scraping, with research expertise in federated learning. Strong background in applying data-driven approaches and leveraging modern frameworks to deliver impactful software solutions.

Experience

Softrobotics Bangladesh Ltd

July 2025 - Present

Software Engineer

<https://www.softrobotics.com.bd/>

- Working on **backend development with ASP.NET Core 8**, building scalable and efficient enterprise applications.
- Contributing to **frontend development using React** for partial/full-stack features.
- Collaborating with cross-functional teams to deliver high-quality, maintainable solutions.

Softrobotics Bangladesh Ltd

Jan 2025 - Jun 2025

Trainee Software Engineer

<https://www.softrobotics.com.bd/>

- Trained in **ASP.NET Core backend development**, focusing on API design and database-driven applications.
- Gained hands-on experience in **Clean Architecture**, ensuring maintainable and testable software solutions.

Department of Computer Science and Engineering

(Sep 2023 - Sep 2024)

-Student Tutor (Teacher Assistant)

BRAC University

- Taught Python and Java programming to undergraduate students.
- Guided them through fundamental and advanced concepts of Python & JAVA.

Projects

Thesis on Federated Learning Topic

<https://dspace.bracu.ac.bd/xmlui/handle/10361/25284>

Conducted in-depth research on federated learning algorithms and proposed new scalable and efficient Federated Learning hybrid framework, analysing their performance across distributed networks.

Chatbot-Ai

<https://github.com/ANIK-01/chatbot-ai>

Built an intelligent chatbot using LangChain and Gemini-1.5-Pro LLM with Retrieval-Augmented Generation (RAG), Hugging Face embeddings, and Pinecone as the vector database for context-aware responses.

Taskflow

<https://github.com/ANIK-01/TaskFlow>

Built the backend of a task management tool to streamline workflows and track productivity using Firebase and Next.js.

Tutor for Hire

https://github.com/ANIK-01/tutorForHire_backend

Developed the backend for a platform connecting tutors and students, enabling class management and payments using Prisma ORM and Express.js.
